

Cry-Baby-Cry

Wisconsin Christian News January 2025 Jim LeBeau
Certified Natural Healthcare Practitioner www.nutrition-for-life.org

“Let them cry, it’s good for their lungs” was the medical mantra the year I was born. Back in 1937 many helpless babies cried from tummy-aches after being fed a formula of Carnation pasteurized condensed milk, water, and corn syrup. Colostrum - what’s that? Species and family specific mother’s milk? What does God know? Oh, almost forgot. He made us and all things. He might know something we don’t. Most churches forgot that as doctors switched babies from mother’s milk to cow milk and abandoned breasts for bottles. That was a big deal for myself and millions of babies - maybe you too? At age 10 I remember lying in bed late at night getting angry at my mother for letting baby brother Bob cry and cry. If you were born any year in America you may have experienced some of this cruelty. *Now you can do something about it.*

In some ways things are worse now than in 1937. The CDC shot schedule begins day one. Pass the needle. Inject the poisons. Who cares how transfer of natural immunity works? If a baby has a pain it has one option - cry. God gave us that power as infants so mothers close by would hear us, hold us close, feed us from a breast with love - a package deal blessing both mothers and babies. God’s ways work as long as we aren’t separated from mothers *and if somebody teaches moms and doctors God’s plan.* Read God’s Plan for Making Healthy Beautiful Babies on the “Babies” page at nutrition-for-life.org. Tell your pastor or priest. Tell your doctor. Tell your family, your friends. If we don’t care about heaven’s blessed little ones, how can we ask heaven to care about us?

Even with a mother’s loving care, crying can create stress. Some mothers have been told “let them cry it out in a separate room” so they can get some sleep. Babies may grow up depressed and angry at the world, not knowing why. Later some take it out on others, and some on themselves with cancer. Dr. Frederick Levenson treated “terminal” cancer patients for ten years. He lost his first patient but “during the nine years since none of Dr. Levenson’s patients died of cancer”. He found the primary cause of cancer to be “aberrations of maternal-infant bond”. His medicine? Love. (The Causes and Prevention of Cancer Stein and Day out of print. See Part IV of Nutrition-for-life kit manual). Does God have a plan for babies so they don’t cry so much, have less cancer, need fewer

dentists, enjoy so many blessings it would take a library to detail them all? He cares for the “birds of the air” and “lilies of the field”. Why would He leave babies out? If God has a plan for our babies and grand-babies who should teach it? It’s not a business plan. It’s not an FDA or CDC plan. *It’s God’s plan.*

As I write this after failing in many efforts to convince churches to care about helpless babies, there is some good news. The next secretary of Department of Health and Human Services (HHS) seems to know the score on America’s toxic food, farm, medical systems, *and he cares.* I think RFK Jr. knows you can’t have healthy babies without healthy moms and dads who depend on clean air, clean water, and whole food from rich topsoil minus the pesticides that find their way onto dinner plates and even into mother’s milk. We have reason to be hopeful, but I am not confident the right message will trickle down to farmers, doctors, moms, and dads who make decisions with whole life consequences on infant care. Even if truth does come the top-down, some awakening is needed bottom-up. *That’s why churches must step up to the plate. This is not an option.*

Just a little kindness for the helpless from those with pulpit power can avoid so much suffering and heal so many lives. What would Jesus do? How does the living Christ feel about God’s plan for making healthy beautiful babies? See “A Gospel of Kindness to Little Ones” link on Babies page nutrition-for-life.org.

TRUTH -,where art thou? “Autism Rates spike in Young Adults” USA Today headline Oct.31, 2024. They say “Improved diagnostic methods” explains it, Fifty or so years ago some doctors tried to explain why heart disease, cancer, diabetes, and other degenerative diseases were spiking in older adults. They said “they are living old enough to get them” A few years later I started to read about kids with heart disease, cancer, diabetes, and “obesity” problems as early as the age of 6 months “living old enough to get them”. It would be funny if it weren’t so sad. If you aren’t capable of critical thinking to separate the wheat from the chaff, you could be taken in by such deceptions ongoing. There is only one good answer for America. It’s for churches to step up with truth and kindness to help crying babies, sick oldsters, and America *in the name of Jesus.* God has a plan for everyone to live a God a glorifying life at any age, but someone has to teach it. *This is a requirement - not optional.* “By their fruits you shall know them”. Make copies of this. You know what to do.
